Final Presentation Grading Checklist and Rubric – CSCI 612, Applied Computer Vision

Rubric	Score [0…10]	Notes
Demo or Upload Professionalism		
Organization of demo with: 1. Features (goals/objectives) 2. Design (block diagram and requirements), 3. Requirements (timing (latency), throughput (e.g., frames/sec), reliability (e.g., TPR/FPR, FN/TN) 4. Analysis (htop, syslog, gprof, other), 5. **MPEG example** output, 6. specific points for final assignment		
Technical content – error free, in depth, presented in clearly		
Interest – motivates topic, develops interest in topic, and shows passion for work done		
Incomplete work and challenges admission of unknowns, concise, confident, but clear indication of future work to improve		
More detail – references to appendix, backup analysis, code, test cases		
Testing done, MPEG shown and live demos		
MINIMUM goals from proposal/report met		
TARGET goals from proposal/report met		
STRETCH goals from proposal/report met		

Score [0…10] - 0…4=incomplete, 5=unsatisfactory, 6=passing, 7=average, 8=good, 9=outstanding, 10=exceptional
